About this Report

The Department has committed to regularly publishing a wide range of statistics relating to the operation of its various business areas.

The purpose of this report is to provide information about the work carried out by the State Administrative Tribunal. A number of different statistics have been included that illustrate different aspects of the criminal court process. Care must be taken in interpreting these statistics. It is NOT possible to compare one indicator with another as the methods of counting are not aligned.

Matters within the Tribunal are grouped into four general areas by Act and are heard and determined by members of the Tribunal with expertise in the various fields. Tribunal members are assisted by sessional (part time) members as necessary with specialist expertise in the relevant fields within each matter. Matters are further grouped into 'lists' based on the specific legislation under which the application has been made.

Separate counting rules that best illustrate the work of the tribunal are utilised for each statistic. Please read the counting rules on each page to help interpret the data.

This version of the report was produced on 04 October 2017. Any variances between figures in this report and other publications may be due to differences in the date the report was produced, and the Department's commitment to the continual maintenance and improvement of data capture and storage.

Requests for additional data:

The Department regularly receives requests from media outlets for customised statistics. All requests for customised figures are considered on a case by case basis. The Department will generally supply such information only where the:

- information is stored in a way that it is easily retrievable; and
- amount of work required to compile and supply customised information is reasonable.

Counting Rules:

- These are the number of matters lodged in the State Administrative Tribunal, broken down by matter type.
- The unit of measure is the number of new matters commenced in the Tribunal during the reporting period.
- If 'n/a' is present in the % Change column, the values of the columns in the table being compared are less than or equal to 10. It is not appropriate to make statistical comparisons for variables with values this low.
- The decline in Human Rights lodgements from 2016/17 was due to a change in guardianship and administration application processes implemented toward the end of 2015/16. Simultaneous applications for the appointment of a guardian and an administrator for the same person were previously counted as two separate applications whereas they are now treated as a single application.
